

# ARE YOU PASSIONATE ABOUT CLIMATE CHANGE AND MAKING A DIFFERENCE FOR A SUSTAINABLE FUTURE?

## MAKE YOUR MARK IN THE BIOECONOMY THROUGH PAMSA'S BURSARY AND RESEARCH PROGRAMME.

The Paper Manufacturers Association of South Africa (PAMSA) is calling for applications from **BEng/BSc in chemical engineering final year students and graduates** for its Master in Chemical Engineering bursary and research programme. The programme covers two years of full time study at participating universities during which students will work on projects relating to beneficiation of wood fibre, recycled fibre or process waste, resource efficiency etc. Participation in the PAMSA bursary programme also facilitates possible employment as an engineer-in-training at participating PAMSA member companies.

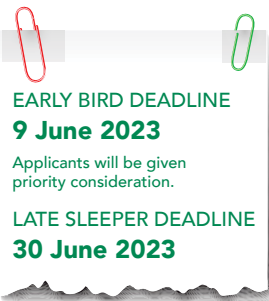

**TOTAL VALUE OF BURSARY OVER TWO YEARS: R320 000**

## CRITERIA FOR APPLICATION

Applications are welcome from students who meet the following requirements:

- You must be a final year BEng/BSc Chemical Engineering student at a registered South African university or a BEng/BSc chemical engineering graduate.
- You must have a good academic record with a minimum 60% average in the final year of study.
- You must have completed your studies in five years or less.
- South African citizenship is an advantage.
- You will be required to submit a CV and academic transcripts for all years of study, as well as letters of reference and motivation.

Interviews will only be held with selected candidates.  
Terms and conditions apply.

**APPLY  
ONLINE**
